

Mares Cyrano 1.3 70

Type: Pneumatic

System: With power adjustment

Operating suggested pressure (BAR): 16 bar

Length (nominal): 70 cm

Length from tip of head to release mechanism: 600 mm

External barrel length: 495 mm

External barrel shape & diameter: Circular section with 40 mm external diameter

External barrel walls thickness: 2 mm

External barrel material: Aluminium

Internal barrel diameter: 13 mm

Head material: Aluminium anodized

Head weight: 31 grams

Head drain holes diameter: 4 hole with 6.9 mm internal diameter with divergent profile

Muzzle material: Aluminium

Piston material: Hardened POM Delrin 100/Case - hardened

Connecting piston diameter (mm): 1.5 mm

Release mechanism material: 100% 316L stainless steel

Line releaser: lateral in 100% 316L stainless steel

Handle & Grip material and angle: Pa6 +15% fibre glass & TPE with 117° angle

Interchangeable grip (left and right): left and right hander

Shaft type length x diameter: threaded 66.9 mm x 8 mm diameter shaft

Shaft material: Stainless steel

Available reels: Spiro 65 – Spiro 87

Special items: Internal barrel is shifted upward off-axis by 4 mm for a better line of aim. Well-made light and resistant carrying bag given standard
