

XT Diving Pro – T4 fins

Material*: 100% carbon fibre with special reactive resin

Available stiffness:** Super Soft 0.8 kg (55 to 65 kg) -- **Soft 0.9 - 1.0 kg** (65 to 70 kg) -- Medium Soft 1.1 to 1.2 kg (70 to 80 kg) -- Medium 1.3 kg (80 to 100 kg) -- Medium Hard 1.4 kg (100 to 120 kg) -- Hard 1.5 kg (120 to ... kg) -- Hard Hard + 1.6 kg

Lamination: 1 days under pressure in the press and 1 days at high temperature

Fibre layers: 2 with V profile

Length (from curve under foot-pocket): 64 cm centrally, 58 cm laterally

Width (measured inside water rails): 19 cm

Foot-pocket / blade angle: 24°

Thickness: tip of foot 1.38 mm, half length 1.00 mm, end of blade 0.48 mm

Blades weight (with water rails): 110 grams

Length and total height of water rails: length 32 cm, constant height 1.8 cm

Shape of blade terminal profile: convex Pteryx type

Foot pocket type & material: KM Dive

Weight of foot-pocket (41-42)*: 540 grams

Total weight of fins (with 41-42 Km Dive foot-pocket): 750 grams

Foot-pocket / blade connection: glued

Longerons - nerves: quite thin and flexible, length 26 cm

Flexion type (Type of Bending): Middle End, Type 4

Blade surface: glossy

Warranty: 2 years

** Hardness is the power that a blade reacts if bent bringing the distance between the two ends to 52 cm
