

C4 Naifu & Naifu S

Blade material: SUS420B (X30Cr13) stainless steel vacuum tempered at 1,020 ° C and cooled with nitrogen at 20 atm, with white Teflon coating

Handle material: 30% glass loaded 6.6 Nylon

Blade total length, max width & max thickness (mm): Naifu S = 70x16x4 / Naifu = 98x20x4

Blade usable length (mm): Naifu S = 60 mm / Naifu = 78 mm

Handle length, max width & thickness (mm): Naifu S = 80x39x14 / Naifu = 105x40x15

Total length in sheath (mm): Naifu S = 160 / Naifu = 209

Total length sheath plus knife (mm): Naifu S = 160 / Naifu = 213

Blade type: Spear point. Standard on one side and constant toothed on the other

Sheath material: Random Polypropylene

Sheath-knife locking system: Mechanical interference between handle and sheath + safety lock system at the back part of the sheath

Folder-spearo fitting system: 2pcs rubber straps with stainless steel buckles

Belt-arm-calf use: Plastic sheath has one cavity in the S version and two in the long version, intended for belt passage, but also calf and arm use thanks to two rubber straps with stainless steel buckles included with the knives

Shaft straightening hole: ø7.5mm hole on Naifu model only

Shaft unblocking system: On Naifu model only

Small line cutter: No

Special solutions: White non-stick coating of the blade

Available handle colours: Black - White

Weight of knife and sheath (grams): Naifu S = 86g / Naifu = 128g
