

## **Meandros Argo bluewater 85**

**Type:** Sling gun

**System:** Triple Circular band

**Length (nominal):** 85 cm

**Length of barrel (measured):** 84.8 cm

**Length from tip of muzzle to release mechanism shaft connection:** 111 cm

**Length from axle of frontal circular band hole to last notch:** 103 cm

**Barrel shape & dimensions:** Elliptical section 40 x 32 mm

**Barrel walls thickness:** 1.5 mm minimum

**Barrel material:** Aeronautical aluminium alloy anodized in single pieces

**Muzzle material:** Composite high quality non-recyclable with glass fiber

**Muzzle type:** Triple circular with steel wire line inferior passage

**Shaft guide:** Open track integrated with aluminium barrel

**Diameter and elongation coefficient of bands:** 3 x 16 mm with 3.3 elongation coefficient

**Release mechanism material:** 100% 316 stainless steel

**Release mechanism line holder:** Steel lateral with possible side change (simple unscrewing of Allen key)

**Handle & Grip material:** Composite high quality non-recyclable with glass

**Barrel to handle and barrel to muzzle connection:** Plugs with O-rings tested to 10 bar

**Interchangeable grip (left and right):** Yes, strongly anatomical (also possible a symmetrical cover)

**Sternal support:** Plastic with lo V shaped profile for best line of aim

**Shaft type and material:** 7.00 mm diameter 17.4 ph thermally hardened steel

**Special solutions:** Elliptical section barrel, great buoyancy due to great air capacity within the pipe. The handle has an exceptional low profile and is totally stiff with no flexion. Unique design, efficiency, long life and functioning of the release mechanism
