

Pathos Sniper 65

Type: Sling gun

System: Double Circular band

Length (nominal): 65 cm

Length of barrel (measured): 65 cm

Length from tip of muzzle to release mechanism shaft connection: 85 cm

Length from axle of roller wheels to last shark fin: 78 cm

Barrel shape & dimensions (mm): Asymmetrical oval section 44.35 wide, 34.12 high (including shaft guide)

Barrel walls thickness: 1.25 mm

Barrel material: Fully anodised aluminium

Muzzle material: Glass loaded Nylon

Muzzle type: Double circular band

Shaft guide: Enclosed track integrated aluminium shaft guide

Diameter and elongation coefficient of bands: 16mm TNT type 3,1 elongation coefficients

Release mechanism material: 100% 316L stainless steel

Release mechanism line holder: small superior steel lever shiftable on both sides

Handle & Grip material: Glass loaded Nylon and ADS foam hard cover

Barrel to handle and barrel to muzzle connection: Plugs

Interchangeable grip (left and right): symmetrical

Sternal support: plastic with anti-slip soft rubber cover

Shaft type and material: 6.75 mm SANDVICK

Special solutions: Sepia float to give buoyancy, mass, and keep the handle floating after the shot. All Pathos spearguns are tested 20 times at 250kg before going to market. Extremely sensitive and with short trigger stroke release mechanism. Pathos reverse trigger mechanism adds up to extra 7cm of loading length compared to standard solutions. Enclosed track integrated shaft guide for more accuracy and faster shot. Muzzle is studied to keep the rubbers parallel to the barrel without touching it for a "cleaner" shot.
