

Pathos Sniper-R 95

Type: Sling gun

System: Circular band plus Roller

Length (nominal): 95 cm

Length of barrel (measured): 95 cm

Length from tip of muzzle to release mechanism shaft connection: 116 cm

Length from axle of roller wheels to last shark fin: 106.5 cm

Barrel shape & dimensions (mm): Asymmetrical oval section 44.35 wide, 34.12 high (including shaft guide)

Barrel walls thickness: 1.25 mm

Barrel material: Fully anodised aluminium

Muzzle material: Glass loaded Nylon

Muzzle type: Roller plus circular band

Shaft guide: Enclosed track integrated aluminium shaft guide

Diameter and elongation coefficient of bands: 16mm TNT type 2,9 and 3,1 elongation coefficients

Release mechanism material: 100% 316L stainless steel

Release mechanism line holder: small superior steel lever shiftable on both sides

Handle & Grip material: Glass loaded Nylon and ADS foam hard cover

Barrel to handle and barrel to muzzle connection: Plugs

Interchangeable grip (left and right): symmetrical

Sternal support: plastic with anti-slip soft rubber cover

Shaft type and material: 7 mm SANDVICK

Special solutions: Water cushion on the Roller system wheels to avoid the bearings that with salt can create problems. Sepia float to give buoyancy, mass, and to hold the rubbers Roller system rubbers without any hole on the barrel. All Pathos spearguns are tested 20 times at 250kg before going to market. Extremely sensitive and with short trigger stroke release mechanism. Pathos reverse trigger mechanism adds up to extra 7cm of loading length compared to standard solutions. Enclosed track integrated shaft guide for more accuracy and faster shot. Muzzle is studied to keep the rubbers parallel to the barrel without touching it for a "cleaner" shot.
