

# Beuchat Redrock

**Thickness of neoprene pants and jacket:** 7mm

**Neoprene type:** Elaskin X8.6 eco-friendly neoprene made mainly from a natural element, limestone. 8 indicates the neoprene.

**Internal neoprene:** Open cell

**External lining:** Elaskin X8.6. 6 indicates the external lining

**Differentiated thickness of neoprene patches:** On the 7 mm trousers the bust neoprene is reduced to 5 mm and on the 5mm pants the bust is slimmed down to 3 mm, for greater comfort and ease in chest expansion.

**Folded neoprene:** Yes, on face profile, wrists and ankles.

**Sternal protection:** A reinforced pad integrated internally in the sternum area provides improved comfort when loading long, powerful spearguns. An external pad made in PU increases grip.

**Elbows & knees protection:** Yes, in high strength Supratex 2

**Back and underarm:** Special cut with long neoprene foil all the way down to jacket waist

**Neoprene of lower jacket:** Internally open cell and externally lined

**Beaver tail closure:** 2 clips

**Waist height:** If cut, height is 43 cm back and front

**Seams on chin:** Seamless on chin with a 360° one-piece face seal for improved comfort, water tightness and durability

**Camouflage:** Red camouflage from the fusion of Trigocamo Wide and a black frame to further break up the spearfisher's silhouette

**Elastic band for trousers:** No. Shoulders straps can do the job in the not cut solution

**Jacket and trousers purchasable separately:** Yes

**Available thicknesses:** 5 and 7 mm

**Special solutions:-** Made entirely of ultra soft Elaskin X 8.6 for a high range comfort. High-end anatomical and pre-shaped cut for maximum comfort. Back cut with special design to avoid water pockets developing on the back and between the shoulders. Beuchat patented PreCut System
