

Beuchat Espadon

Thickness of neoprene pants and jacket: 7mm

Neoprene type: Eco-friendly neoprene made mainly from limestone

Internal neoprene: Open cell

External lining: Elaskin X8.2

Differentiated thickness of neoprene patches: On the 7mm trousers the bust is slimmed down to 5mm for more comfort and ease (3 mm on the 5 mm pants)

Folded neoprene: No

Sternal protection: Anti-slip and anti-wear PU segmented area with hexagonal elements on the sternal zone

Elbows and knees protection: Only on the knees with segmented hexagonal PU elements

Back and underarm: Very special and refined cuts for the back, underarm and arms

Neoprene of lower jacket: Open cell except for beaver tail and frontal 2 clips area

Beaver tail closure: 2 clips

Waist height: Long john up to the neck

Seams on chin: Seamless on chin with a 360° one-piece face seal for improved comfort, water tightness and durability

Camouflage: No, black

Elastic band for trousers: Long John solution

Jacket and trousers purchasable separately: Yes

Available thicknesses: 5mm and 7mm

Special solutions: Made entirely of ultra soft Elaskin X 8.2 for a high range comfort. High-end anatomical and pre-shaped cut for maximum comfort. Back-cut with special contours on the rear of the suit to avoid pockets developing on the back and between the shoulders. Large red area on the hood for best visibility and safety at the surface
