Elbows and knees protection: On knees with anti-slip and anti-abrasion rubber print

Back and underarm: Single neoprene sheet on the back and small rhomboidal patch in the underarms

Neoprene of lower jacket: External lined and internally open-cell

Beaver tail closure: Double clips

Waist height: 44 cm frontally and 49 cm at the back

Seams on chin: No

Camouflage: Yes, Red Stone

Elastic bands for hanging the pants: Yes

Jacket and trousers purchasable separately: yes

Available thicknesses: 3, 5, 7 mm

Special solutions: High visibility camo at the surface classifies it as one of the best wetsuits for safety purposes. As the spearo descends, the red color is absorbed and transforms into brown camouflage, which makes hunting perfectly efficient.

Internally lined neoprene near the ears allow easier equalization by avoiding the sucker effect (vacuum around ears). The hood equipped with drain holes system evacuates the air trapped.
